

FAQ's

What kind of results should I expect?

Everyone can expect some collagen tightening. Many patients have seen:

- Smoother, tighter skin with less sagging
- Redefined contours along the jaw line and under the chin
- Softening of wrinkles and fine lines around the mouth, eyes and forehead
- Tightening the saggy skin under the chin

How does it work?

As you age, the collagen in your skin breaks down resulting in wrinkles and sagging skin. Thermage uses patented radiofrequency (RF) technology to safely heat the deeper layers of your skin, stimulating existing collagen and promoting new collagen growth for younger looking skin.

How long will the results last?

The effects continue to improve for up to six months following a single treatment. Results can last for years depending on your skin condition and natural aging process.

How long before I can return to my normal activities?

There's no special care needed after the procedure and most patients return to their regular activities immediately following treatment.

Side effects are generally mild and may include redness, swelling, blisters, bumps and rare instances of surface irregularities.

Learn More About the Thermage Face procedure

Don't wait. Ask your doctor to show you how fast and easy it is to get back the you, you used to know — without surgery, injections and little to no downtime.

“ I was thrilled. My skin was smoother. My laugh lines were less visible and my jaw line had better definition. I couldn't put the mirror down. ”
Jane, Los Alamitos, CA

“ People say I don't look 50. That's because of Thermage. Thermage is my fountain of youth! ”
Grace, Miami, FL
